780-850-0854 | walterteljega15@gmail.com

I am ambitious and passionate, with a strong command of various technologies and I constantly strive to embrace new development techniques and coding languages. As a dedicated team player, I am committed to supporting colleagues and effectively tackling projects, embracing new and diverse challenges head-on. My proactive approach and adaptability ensure that I continuously grow while contributing meaningfully to every team I join. Currently, I'm excited to be partaking in a project to bring a client's website vision to life.

EXPERIENCE

FULL STACK DEVELOPMENT (CAPSTONE)

Moyo Mind Studio

January 2023 – April 2023

- Collaborated alongside both my team and the client to execute the development of a website.
- Developed, edited, integrated, and tested software code in tandem with documentation.
- Meticulously designed and developed a tailored database that aligns with the client's unique requirements.
- Dynamic pages that would give them more flexibility and room for potential expansion.

FULL STACK DEVELOPMENT & ENTERPRISE SOFTWARE ARCHITECTURE (CAPSTONE)

Alberta Health Services

January 2020 – April 2020

- Collaborated with the AHS IT team to implement a rich-interactive media portal to facilitate viewing assets (images/videos) stored within the org-wide SharePoint database.
 - Brought about a full-E2E implementation, design, analysis, testing, end-user product fit while ensuring stakeholder needs were fulfilled with high end-user satisfaction.
 - Quickly improved new technologies, enhancing reliability, UX, and usability compared to prior tools.
 - Executed complete flow from database schema, server-side logic, RESTful API, to end-user visualization.
-

API HUB

C#, ASP.Net, HTML/CSS, JavaScript

October 2024 – May 2025

I created a multi-page website integrated with multiple external APIs to pull real-time data and display it in an interactive chart using Apex charts. I implemented a responsive design for seamlessly across devices. I have enhanced user interaction with hover effects on charts. It will be a work in progress as there will be more differences in variation to come from pulling and displaying data.

NHL STANDINGS

HTML/CSS, JavaScript, jQuery, Data Tables

March 2021

Created an easy-to-use viewer for NHL standings using the NHL JSON API with dynamic AJAX requests and parsing into the jQuery, DataTable plugin. Provides a fully responsive CSS layout that dynamically scales content to fit the user's device. (mobile/desktop)

EDUCATION

BACHELOR OF APPLIED INFORMATION SYSTEM TECHNOLOGY DEGREE (BAIST)

Northern Alberta Institute of Technology

Current

DIGITAL MEDIA & IT DIPLOMA (DMIT), COMPUTER SOFTWARE DEVELOPMENT STREAM

Northern Alberta Institute of Technology

KEY SKILLS

- C#
- HTML / CSS
- JavaScript / jQuery
- RESTful API
- Bootstrap
- .NET Frameworks / Core / MVC / Razor
- CI / CD
- Mobile Development
- XML
- SQL and Oracle

SOFTWARE

- Microsoft SQL Server
- Visual Studio Code
- Git / Github
- Microsoft Office (Word, Excel, Access, etc.)
- Android Studio
- SAP/ERP
- Visual Studio
- Oracle Forms Developers
- Azure Platform (Portal, DevOps, Cloud)
- SQL Server
- Power BI

OTHER SKILLS

- Problem Solver and Strong Analytical skills
- Verbal and Written communication
- Full-Stack Development (Front-End/Back-End)
- Organized and Responsive
- Agile and Waterfall Methodology / SCRUM
- Troubleshooting / Debugging
- Time Management / Punctual
- Object-Oriented Programming (OOP)
- Team Collaboration / Team Player
- Eagerness to learn and grow
- Object Orientated Analysis and Design
- Attention to detail
